

APPLY NOW

Initiative Application

VIRTUAL VEHICLE develops innovative solutions for future mobility - with a unique combination of simulation technology and real vehicle testing. Our focus lies on the optimisation of test and validation processes in the automotive and rail industries - with an increasing focus on future-oriented domains such as energy, maritime, defence and health tech. In close cooperation with industry, research and science, we bring new technologies into direct application.

With over 300 employees, we are not only a key driver of innovation, but also a place for brilliant minds who really want to make a difference.

Whether you are studying, starting your career or already have experience, you will find exciting projects, creative freedom and development opportunities with us.

Your Tasks

Contribute your expertise and ideas to exciting projects - from virtual development and real-life testing to pioneering technologies.
Whether automotive, rail or new domains such as energy, maritime, defence or health tech: with us, you will actively shape technological innovation.

Your Profile

Do you like to think outside the box, have a structured way of working and enjoy interdisciplinary collaboration?
Then you will fit in with us!
We are looking for motivated people with technical curiosity, team spirit and the desire to make a difference - in an international, dynamic environment.

Show us what you are made of!

Do you want to help shape the mobility of the future - with **innovative ideas, technical curiosity and a desire for real applications?** Then you've come to the right place!
Whether you are **still studying**, at the **start of your career or already have experience**: we look forward to receiving your unsolicited application.
Tell us what interests you, where you see your strengths and why you want to be part of our team. Together we will find out where you can make the best impact with us.
